

Is your office still paying for bottled drinking water? **Did you know there's an easier, more economical, and GREEN alternative?**

AQUA CLEAR WATER SYSTEMS

We carry a variety of drinking water filtration systems that eliminate the need for heavy bottled water jugs. No delivery man, no lifting, no wasted floor space and you will never run out of drinking water again. Start making your own pure, fresh, and healthy drinking water at your office today!

SAVE MONEY

With a water filtration system you can eliminate the weekly expense of bottled water delivery. All of our systems are inexpensive to operate and maintain and the savings are recognized immediately.

KEEP YOUR COOL

Our water filtration systems will work with any water cooler. And if you don't currently own a cooler we'll give you a great deal on a new one. We carry a wide range of both hot and cold water dispensing units for tea, coffee and cool drinking water.

NO OFFICE TOO BIG OR SMALL

Whether your office has 3 or 300 employees, we can meet your drinking water needs:

- STAFF AND LUNCH ROOMS
- COMMON AREAS
- WATER COOLERS AND FOUNTAINS
- COFFEE AND TEA MAKERS

FRESH WATER ANYWHERE

Unlike traditional water coolers we can put drinking water in practically any area of any office building. With the help of a distribution pump our water systems can reach even the farthest corners of your office. This puts refreshing drinking water at the reach of all your employees without them having to walk to a central area.

CHANGE IS A GOOD THING

Maintaining your healthy drinking water is easy. Stop having the bottle delivery guy come to the office every week. To ensure you're drinking the best water possible, we'll schedule a "cleaning" visit every 3 to 6 months...just like the dentist (only better). Additional service appointments can be made on short notice if needed.

- **NO DELIVERIES**
- **NO JUGS TO STORE**
- **NO LIFTING**

For more information on a Water Filtration Service Agreement for your office, complete and return the form below.

YES! Our office would like more information on the Commercial Water Filtration Agreement
